“Milking machine – easy”

On this course it will be discussed the importance of milking machine on mastitis and the basic principles of milking.

It will also be shared tips to promote changes in small details that can make the difference on the farm.

SPEAKER:
Rafa Ortega

DATES:
14th September - 14:00h
16th September - 20:00h

“Milking machine – advanced”

The importance of working with liners, vacuum and pulsation. The “triad” of milking system is composed by the liners, vacuum level and pulsation, that in some cases can originate inflammatory response, without the involvement of bacterial infection – the milking stress.

In this course, it will be approached how to balance a good teat end health with a fast and effective milking by manipulating the “triad”.

SPEAKER:
Rafa Ortega

DATES:
19th October - 14:00h
21th October - 20:00h

“How to impact milk quality on AMS farm?”

Satisfactory udder health can be achieved in all robotic systems, but requires unique control measures in addition to those used in conventional systems. This course gives those working with AMS herds the tools to identify, understand and mitigate the specific risk factors for udder health. This will allow both cow health and milk quality to be maintained at acceptable levels in both new and converted AMS farms.

In this course, it will be approached how to balance a good teat end health with a fast and effective milking by manipulating the “triad”.

SPEAKER:

Tom Greenham

DATES:

16th November - 14:00h

18th November - 20:00h

“New legislation in EU”

New EU Regulation 2019/6 on veterinary medicinal sets out rules for the sale, manufacture, import, export, supply, distribution, control and use of veterinary medicinal products (VMPs), aiming to modernise legislation; stimulate innovation in and increase the availability of VMPs; strengthen the EU’s campaign against antimicrobial resistance.

During this session we will know how this new legislation affects the dairy industry and its professionals

SPEAKER:

Malgorzata Cebula

DATES:

14th December - 14:00h

16th December - 20:00h

TOM GREENHAM

Tom is a director in Advance Milking Limited, a consultancy service for all aspects of udder health and milking machine optimisation.

Advance Milking provide specialist advice for dairy farms in the UK and Ireland, as well as working around the world to deliver training and independent support to dairy engineers, veterinary surgeons, and other industry stakeholders. Research is a growing area of work, with Advance Milking currently leading studies on milking efficiency and udder health, as well as providing independent advice for novel product development.

Tom's background is in veterinary medicine, with ten years in dairy practice prior to setting up Advance Milking in 2017 with colleague Dan Humphries. A growing interest in udder health and milking performance led to specialisation in this area, providing advanced advice on the milking machine's impact on mastitis, milk quality and milking efficiency.

RAFA ORTEGA

Rafael Ortega has over 20 years' experience in Milk Quality. He has a degree in Veterinary Science from the Veterinary Faculty in Córdoba (Spain) and is a member of various specialist groups such as the National Mastitis Council or the Milking Machine Committee.

He has participated in numerous research projects and also on different technical publications on milk quality, most notably the book entitled "Guía solomamitis del asesor en calidad de leche" [Solomamitis guide for the milk quality consultant] which he co-wrote with 4 European colleagues, and which was issued in 2016. He is currently responsible for the Regional Technical Services Ruminants Business Unit at HIPRA for Brazil, Uruguay and Argentina.

MALGORZATA CEBULA

Malgo Cebula is Legal Advisor at Hipra. Among others, she is responsible for validation of the marketing campaigns and materials for Ruminants and Agriculture Business units. She graduated from Andrzej Frycz Modrzewski Krakow University (2009) with Master of Arts (MA) in Law and from Kozminski University (2016) with Master of Laws (LLM) in International Commercial Law.

Malgo actively participated in recent creation of the project of the Code of Marketing Ethics for the Polish Association of Producers and Importers of Veterinary Medicinal Products (Polprowet) and recent revision of the Spanish Veterindustria Code (la Asociación Empresarial Española de la Industria de Sanidad y Nutrición Animal). She also participates in workshops and training organized by the Warsaw Bar Association.
